

Component	Component Description
Contract	Allegro Contract captures and manages contract information across the enterprise and through contract management processes
Credit	Allegro Credit manages and reports on credit requests, credit ratings, credit review procedures, limits, credit availability, and credit value at risk
Price	Allegro Price captures and manages commodity prices, forward curves, volatilities, and correlations
Currency	Allegro Currency provides multiple currency, currency exchange and trading, and interest rate capabilities
Trade Strategy	Allegro Trade Strategy links physical and financial positions to form strategies for reporting and analysis
Optimization	Allegro Optimization calculates the incremental valuation of all possible dispositions of long and short commodity positions, based on market prices, transportation, storage and processing information
Simulation	Allegro Simulation analyzes potential market changes, including how prices, volatility, interest rates, currency exchange rates, quantities, and weather may impact valuation metrics
Trade Execution	Allegro Trade Execution captures and confirms physical and financial trades for commodities and currency
Position	Allegro Position provides trading and risk management metrics by position, including mark to market, position limits, and profit and loss
Settlement	Allegro Settlement calculates prices, fees, and terms; and creates invoices, statements and accruals for commodity, currency, and services positions
Natural Gas	Allegro Natural Gas manages physical gas scheduling, nomination, capacity utilization, measurement, allocation, and imbalances on natural gas pipelines
Net Valuation	Allegro Net Valuation enables the valuation of inventory along with the ability to complete net forward, net back, and profit margin calculations across commodities including commodity value, transactional, and transportation costs
Hedge	Allegro Hedge defines hedges, performs prospective and retrospective analysis, and creates hedge accounting entries
Property	Allegro Property manages oil and gas producing properties and division orders
Equity Production	Allegro Equity Production manages the marketing of oil and gas production, including volumetric forecasts, nominations, wellhead balancing, measurement, and variance analysis
Revenue	Allegro Revenue captures revenue receipts, creates allocations, distributes revenues to interest owners, prepares revenue disbursements and regulatory reporting
Natural Gas Processing	Allegro Natural Gas Processing manages natural gas processing operations and plant allocation
Retail Natural Gas	Allegro Retail Natural Gas supports natural gas retail operations for forecasting, sales, usage measurement, allocation, balancing
Fractionation	Allegro Fractionation manages the scheduling, fractionation, and actual measurement of the fractionation of natural gas liquids
LNG	Allegro Liquid Natural Gas manages the scheduling and actual measurement of gas-to-liquid and liquid-to-gas processing for LNG operations
Logistics	Allegro Logistics provides management of multi-commodity logistics across various carrier modes such as truck, rail, pipeline, barge, and vessel
Option Analytics	Allegro Option Analytics supports trade capture and valuation of most standard and a variety of exotic option trade types applicable to the energy industry
Petroleum Blending	Allegro Petroleum Blending manages the scheduling, blending, and actual measurement for blending of liquid petroleum products
Power	Allegro Power manages physical power scheduling, transmission and actualization of power and ancillary services

Component	Component Description
Generation	Allegro Generation manages power generation and economic dispatch
Retail Power	Allegro Retail Power supports electric power retail operations for forecasting, sales, usage measurement, allocation, and balancing
Emissions	Allegro Emissions manages the capture, valuation, and settlement of emission certificates and renewable energy credits, including inventory reporting, surrender process, and registry reconciliation
Price Connect	Allegro Price Connect provides web service imports of market price, forward curve, volatility, correlation, currency, and interest rate information from external data sources
Exchange Connect	Allegro Exchange Connect provides bidirectional web service integration with commodity exchanges to receive market prices, submit bids/offers, cancel bids/offers and receive real time trades
Trade Connect	Allegro Trade Connect provides efficiency for OTC instant message (IM) trading processes and improves visibility into company positions with intraday pricing and real-time position valuation.
FERC Connect	Allegro FERC Connect provides bidirectional web service integration with FERC to extract and compile transactional data to meet FERC Form 552 and FERC EQR reporting requirements
NETA Connect	Allegro NETA Connect provides bidirectional web service integration with the NETA market system, including bilateral submission and retrieval of volume, transaction status, forward positions, and periodic reports
ESS Connect	Allegro ESS Connect supports efficient power scheduling communications for electric utilities with delivery obligations in the European power market.
ERP Connect	Allegro ERP Connect provides bidirectional web service integration with Enterprise Resource Planning software
Decision Metrics	Allegro Decision Metrics 8.1 enables companies to create key performance indicators and monitor them in real-time via any web browser or tablet device
Workflow	Allegro Workflow creates procedures to manage documents, data import and export, notifications, and messages
Credit Connect	Allegro Credit Connect provides interface to import credit rating and credit fundamental data
Systems Admin	Allegro Systems Admin manages data definition and synchronization, visual interfaces, process model, audit trails, and security

Allegro is a global leader in energy trading & risk management solutions for power and gas utilities, refiners, producers, traders, and commodity consumers. With more than 27 years of deep industry expertise, Allegro's enterprise platform drives profitability and efficiency across front, middle, and back offices, while managing the complex logistics associated with physical commodities. Allegro provides customers with agile solutions to manage risk across natural gas, power, coal, crude oil, petroleum products, emissions, and other commodity markets, allowing decision makers to hedge and execute with confidence. Headquartered in Dallas, Texas, Allegro has offices in Calgary, Houston, London, Singapore, Sydney, and Zurich, along with a global network of partners.
