

## Petroleum Solutions Overview

Upstream to downstream, Allegro provides the broadest set of integrated Petroleum industry solutions available for physical logistics, financial transactions, energy marketing and trading, risk management and regulatory compliance. Petroleum producers, first purchasers, refiners, petrochemical producers, marketers and traders rely on Allegro's comprehensive petroleum industry focus and domain expertise as the solution of choice for global energy providers.

### Exploration and Production

Allegro provides a complete solution set for petroleum producers with enterprise applications for equity production management, accounting, marketing and trading, and risk management. This comprehensive solution allows an enterprise to manage contracts, administer lease level data, forecast production volumes, reconcile oil and gas production with revenues, and accurately allocate revenue to interest holders. Additionally, it enables them to ensure regulatory compliance and manage price volatility along with credit and other market risks. Through a single solution, Allegro provides the ability to compute complex net back calculations.

### First Purchasers

Allegro supports the entire first purchaser business process including comprehensive management of price, physical and credit risks. Users manage term and evergreen contracts, and use flexible pricing formulas, including discounts and premiums to spot index prices or other benchmarks. Allegro also lets first purchasers capture associated product quality data and other adjustment factors — all of which become instantly available to risk management, accounting and other enterprise personnel. With Allegro's integrated revenue components distribution of revenue is seamless and accurate.

### Refining and Marketing

Refiners, petrochemical producers, pipeline operators and fuel distributors face a variety of specialized challenges associated with purchasing, sales, forecasting, optimization, quality assurance, trading and risk management, production/transaction accounting, auditing and regulatory compliance. Allegro solutions allow an enterprise to manage transactions, inventories, fractionation, re-branding, run ticket capture, forecast production, and calculate volumes and profitability across multiple feedstocks and products.
